Interference

Interference No. 104,789 has been terminated by a decision adverse to applicant. *Ex parte* prosecution is resumed.

An adverse judgment against claims 2, 3, 7 and 10 has been entered by the Board. Claims 2, 3, 7 and 10 stand(s) finally disposed of for failure to reply to or appeal from the examiner's rejection of such claim(s) presented for interference within the time for appeal or civil action specified in 37 CFR 1.304. Adverse judgment against a claim is a final action of the Office requiring no further action by the Office to dispose of the claim permanently. See 37 CFR 41.127(a)(2).

Claim Objections

Claims 4-6 and 8 are objected to as being dependent upon a rejected base claim, but may be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

NOTE: the rewriting of the claims in independent form may add confusion to the claims for claims 4-6 and 8. This is because claims 4 and 8 are not within the scope of their respective base claims. For example, claim 4 encompasses a formula of claim 2 wherein one R group is a Z-L-moiety and another R group is a COX group, thus two R groups are substituted with moieties including targeting agents and possibly amino acids. However, claim 2 does not encompass such a formula because it states "one R or R' is L" and therefore only one R or R' may be substituted in manner to include targeting moieties and amino acids. Thus, if one R group is the Z-L moiety in claim 4, there is no possible substitution on the formula of claim 2 that would allow for the COX moiety. For the same reason, the only one substitution, the compounds of claim 10 do not appear to be within the scope of claim 2. It appears that this may be rectified by merely amending claim 4 to be an independent claim, making sure all variables in the formula are defined and for claim 4, stating "A reagent comprising a targeting moiety covalently linked to a metal chelator having the formula....(the rest of claim 4). However, for claim 8, no clear resolution is seen because this claim cannot be merely made into independent form, as it would be unclear where the

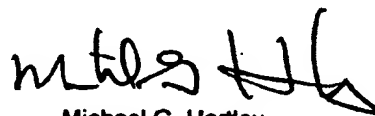

Art Unit: 1618

targeting agent would be as a substitution, thus, it may be broader than originally claimed and raise new matter issues. The possibility of amending this claim to be dependent on claim 4 exists, only if it can be clearly shown that the chelators in claim 8 are within the scope of claim 4.
